

WORK EXPERIENCE

Lab Manager/Research Assistant, Systems Neuroscience Lab

Nov 2024- June 2026

- Worked with Dr. Douglas Nitz, Professor of Cognitive Science to understand how humans make sense of impossible non-Euclidean and non-metric worlds in a VR setting.
- Created virtual environments compatible with Unity and Unreal Engine to help understand cognition of navigation.
- Lead and conducted user testing using VR and additional components for cognition experiments with the lab.

UX Design Intern, PipingRock Health Products

June 2025- Aug 2025

- Conducted user research on 20+ in-house brands using Microsoft Clarity to identify usability issues and behavioral insights, analysing heatmaps, session replays, and click data to identify underlying issues on the pages.
- Researched and drafted UX/UI improvements across different brand PDPs, homepages, and cart pages to enhance user flow and conversion rates.
- Designed squeeze pages on Adobe XD to improve conversion rates.
- Redesigned the homepage of one brand (Champion's Performance), focusing on usability, accessibility, and engagement.
- Created mockups in Lovable to propose a new article page layout, improving readability and user retention.
- Designed supporting UX elements: sticky CTAs, low stock messaging, product bundle layouts.

MAVERiC XR Studio Intern, Origami Air Co.

Apr 2025- June 2025

- Built a fully immersive virtual reality system from scratch using Unity.
- Learned different techniques and asset creation for level design.
- Created a custom particle system, shader graphs and different VFX sequences using fog, bloom, color grading, and volumetric lighting to create a full sense of immersion for viewers.
- Used user testing, iterating and prototyping techniques for two months before launch of the final product.

EDUCATION

UC San Diego

2023-2027

- BSc in Cognitive Science Specialising in Design and Interaction
- BA in Interdisciplinary Computing and the Arts (CS + Art)
- GPA: 3.93
- Resident Assistant at Eighth College
- Research Assistant at Protolab & Lab Manager at Systems Neuroscience Lab UCSD
- Muir Caledonian (Honors) Society
- Computer Science and Engineering Society, Design for America
- Licensed in Social and Behavioural Research (CITI Program)

KEY SKILLS

UX Research and Design

- Behavioral analytics
- Comparative analysis
- User flow evaluation
- Wireframes and Prototypes
- Conversion-focused design

Tools

- Creative Cloud Software
- Figma and Adobe XD
- Blender, Unity and Unreal Engine
- HTML, Java, Python
- Microsoft Clarity

PROJECTS

Beli Feature: Eaters Like You

Apr 2026- June 2026

- Redesigning a food-review app by introducing a new feature that accomodates users with dietary restrictions better.

Vita Viridi Squeeze Page

June 2025

- Designed two high-converting squeeze pages [A/B testing] for a wellness brand.
